

Transition Time !

NSC Cardiology is now using a new billing company- MEDCONVERGE as of Sept 16th 2021. Our old company is restricting chart access therefore we will need you to sign some new paperwork the next time you visit the office or download from the website. We look forward to improving the billing experience soon! Our **patient portal** will also require a new link https://mycw152.ecwcloud.com/portal21278/jsp/100mp/login_otp.jsp

We also hope to improve the front desk experience with the addition of new staff and less automated attendant options. Always know that if you are having trouble accessing us please email Dr Singh directly DrSingh@nsccardiology.com

Cumming Office – We are excited to announce that we will be in our new Cumming office after the Thanksgiving holidays! The office will still be on **Northside Forsyth hospital campus but in the 1100 Building , Ste 345**. We will be able to do stress testing and echo and vascular ultrasounds on site with this move!

Student teaching- You may know that Dr Singh is a Clinical Assistant Professor at both the Medical College of Georgia and now also at Mercer University in Atlanta. You will likely see students with him both in the clinic and hospital.

Welcoming Kelsie Godward PA-C

We are pleased to welcome Kelsie Godward to our practice. Kelsie grew up in Texas and obtained her Bachelor's in Biology in San Antonio before coming to Atlanta. She graduated from the Philadelphia College of Osteopathic Medicine (PCOM) with a Masters in Physician Assistant studies this year.

Kelsie will be assisting Dr Singh at both the John's Creek and Cumming office location as well as seeing patients in the nearby hospitals.

Physician Assistants have extensively trained and are licensed by the Georgia Composite Medical Board. They can see patients independently while under physician supervision. Always know that Dr Singh and Kelsie communicate after each patient encounter to ensure optimal care.

We look forward to Kelsie helping us keep our commitment to providing the best patient- centered, evidence- based, holistic cardiac care for our community !
