

Scannable QR codes and Google Reviews

Providing access to information about your heart is very important to us and we have made it easier with the use of scannable QR codes that will link you directly to our website www.heartdrsingh.com. In addition, the strength of the practice is in part based on how you perceive and rate us. For those of you that have had a positive experience please use the QR codes to post a review. If you have had a negative experience, please contact our practice administrator Crystal@nsccardiology.com to discuss as we are constantly trying to improve our care delivery!

For all billing inquiries, we have a new number **866-949-1215**

SELF PAY OPTIONS – With many patients having high deductible plans our self-pay option is often a reasonable alternative to having the test paid through insurance. We have some of the lowest self-pay rates for testing and these rates can be found on our website. Self-pay requires payment in full on the day of the test. There is usually no delay in testing since no insurance authorization is needed. Multiple tests can be done on the same day and often can be reviewed the same day!

HEART PROTECTION PREVENTION PROGRAM – We will shortly be launching a screening prevention program package that will conveniently assess your cardiovascular risk on an annual basis outside of the insurance system. Makes a loving Xmas gift!

Welcoming Krishnan Prabakaran!

Congratulations to Lynae Dao on her newest addition to the family healthy baby boy named Ash. Sadly, with three young kids Lynae will be leaving the organization. We will miss her immensely, but she will continue to assist from afar!

We are very pleased to welcome Krishnan as our new certified nuclear tech. I had the pleasure of working with him in the past at Northside Hospital. He is wonderful to interact with and has outstanding credentials and expertise having served in multiple leadership roles. Our nuclear lab is at the Johns Creek office and studies are performed there on Tuesdays and Thursdays.
