

NSC Cardiology and CVCNG Join Forces!

NSC Cardiology and the Gainesville-based **Cardiovascular Clinic of North Georgia (CVCNG)** will now work in a collaborative relationship to help deliver the highest quality care to our patients. While the practices will remain independent, they will share certain resources that allow state-of-the-art technology options for our patients. Both practices are part of a rapidly growing network of cardiology clinics across the country powered by US Heart and Vascular Inc.

Over the coming months you will see a number of changes including the ability to register and fill out visit forms online or on your mobile device. We also will have a new patient portal for you to be able to view test results.

Our **billing office numbers** will have changed and inquiries about services delivered after September 21, 2026 should be called to Cedar- 844-550-3525 while services delivered prior to that date will remain with ACE Health-706-607-0155

We hope to soon be offering state-of-the-art PET/CT imaging at a facility in the Lawrenceville Suwanee area that allows us to identify both plaque and perfusion abnormalities more efficiently and accurately.

While changes are not always easy, we are committed to our mission of delivering the very best **patient centered, evidence-based, holistic care** to keep your heart healthy.

Please visit our website at www.nsccardiology.com for the latest updates.!

New Research Trials Starting Enrollment! Contact us for a free evaluation for the following trials:

Maritime Switch-if you are nondiabetic and have been on the same dose of a GLP-1 for 3 months without significant weight loss you may be eligible for study looking at a new compound potentially expected to be more effective

ROXI-Everest-if you have atrial fibrillation requiring anticoagulation this trial will compare apixaban(Eliquis) to twice a month injectable with potentially less bleeding and bruising

Maritime Pen-if you are nondiabetic with a BMI over 27 and do not have access to a GLP-1
OR Ambience -if you have cardiovascular disease and a BMI over 27 and do not have access to a GLP-1

Welcoming Michelle Joyner – Lead Medical Practice

As many of you know, **Crystal Richards**, our practice administrator is on maternity leave! We are very excited for her and the growing family! Stay tuned for pictures in the coming weeks!

We are equally excited to have **Michelle Joyner** help fill the void with our practice administration and research team. Michelle is originally from Savannah with extensive experience in the medical office having been a practice manager in Cumming, GA.

She has already excelled in a rapidly changing environment and we are excited to move the practice forward with her guidance.
